THIS report, the sixteenth of its kind, furnishes statistics of the total trade, external and internal, of the Lower Provinces of Bengal, carried by rail during the year 1899-1900 as registered under the block system. It is based on returns furnished by the officers named in the margin, and on the following materials, *viz.*, the Report on the earnings of the East Indian Railway Company; the Report by the Collector of Customs, Calcutta; the Report by the Railway authorities on changes in railway freights; the weather and crop report of the Director of Land Records and Agriculture, Bengal, and the trade valuation statements received from four selected marts, the Collector of Customs, Calcutta, the Board of Revenue, L. P., the Calcutta tea and indigo brokers, and from the several Local Governments and Administrations in India.

Classification of articles.

2. In accordance with instructions received from the Director-General of Statistics, No. 208R., dated the 22nd March 1899, unrefined sugar has been distinguished from *gur*, *rab*, jaggery, molasses, &c., in the trade returns with effect from the 1st April 1899. No other change in the classification of articles was made during the year under report.

Valuation of articles of trade.

3. The value of all the articles of trade specified in the valuation statement appended to this Report have been assigned according to the system explained in the Reports for 1893-94 and 1896-97.

Registration of the inter-provincial river-borne traffic between the N.-W. P. and Oudh and Bengal.

4. The statistics of the river-borne trade between the North-Western Provinces and Oudh and Bengal during 1899-1900 have been incorporated in this report.

CHAPTER I.

GENERAL SUMMARY OF THE SEASONS AND RESULTS OF THE HARVESTS AND NOTICE OF PRICES.

Character of the season.

THE early showers of April and May were generally above the normal, except in North Bengal and parts of Chota Nagpur. The monsoon broke in June, and gave heavy but unequally distributed rain to Bengal and Bihar; in Orissa and Chota Nagpur, however, it was insufficient throughout the monsoon season. In July and August the rainfall was exceptionally heavy in most parts of the province except in South-West Bengal and Orissa, where it was slightly below the normal, and in Chota Nagpur, where it was only half the normal fall. In September it was general and practically normal everywhere except in Orissa and Chota Nagpur, where it was deficient; in October it was below the normal all over the province excepting Orissa and Eastern Bengal, where it was excessive. There was little or no rain in the two following months, while in January it was below the average everywhere except in Chota Nagpur and Bihar, where it was greatly in excess, hailstorms doing considerable damage in many parts of Bihar. In February the fall was general but very slight in Orissa, Bihar, and Chota Nagpur, and in March it was general and fairly well distributed.

The rains or *bhadoi* and *aus* crops.

2. The season was to some extent unfavourable to the *bhadoi* crops. The final estimate made by the Agricultural Department of the outturn of these crops as a whole is 70 per cent. of a normal crop, as against 94 per cent. in 1898-99.

Winter rice.

3. The outturn of the winter rice crop was fair, and it is estimated by the Agricultural Department that a 95 per cent. crop was harvested for the province as a whole, as against 105 per cent. in 1898-99.

Rabi crops.

4. The area under all kinds of *rabi* crops was less than in 1898-99, the contraction being due to want of sufficient rain at the time of sowing. The outturn for the province as a whole is estimated by the Agricultural Department at 87 per cent. of a normal crop, as against 97 per cent. in 1898-99.

Jute.

5. Owing to a rise in the price of jute, coincident with a fall in the price of rice in 1898-99, there was an increase of over 21 per cent. in the area sown with jute in 1899-1900, as compared with the previous year. The outturn of jute is estimated by the Agricultural Department at 80 per cent. of a normal crop as against 88 per cent. in 1898-99.

Indigo.

6. The indigo crop was considerably damaged by the heavy rainfall in June, July, and August. The outturn for the province is estimated by the Agricultural Department at 60 per cent. of a normal crop, as against 88 per cent. in 1898-99.

Tobacco.

7. The weather was on the whole fairly favourable to the tobacco crop. The outturn of the Rangpur district, in which this crop is grown most largely, was 76 per cent., as compared with 91 per cent. in 1898-99, but in the other important tobacco-growing districts it was generally higher. The Agricultural Department estimates the outturn for the province as a whole at 97 per cent. of a normal crop, as against 90 per cent. in 1898-99.

Sugarcane.

8. The season was to a certain extent less favourable to the sugarcane crop than that of the preceding year. The outturn for the Lower Provinces is estimated by the Agricultural Department at 84 per cent. of a normal crop, as against 92 per cent. in 1898-99.

9. Owing to the unevenly distributed rainfall the poppy crop was bad everywhere except in the Champaran district, where it was almost normal. The outturn is estimated by the Agricultural Department at 79 per cent. of a normal crop, as against 84 per cent. in 1898-99.

Opium.

10. *Ganja* is grown only in the Rajshahi district. The previous year's crop was short, and under the stimulus of unprecedentedly high prices the cultivation in 1899-1900 was considerably extended. Owing, however, to the heavy rains in June and July, the average outturn is estimated at 75 per cent. of a normal crop, as against 88 per cent. in 1898-99.

Ganja.

11. A detailed statement giving the outturn of the principal crops, district by district, during the year 1899-1900 has been compiled from the reports published by the Department of Land Records and Agriculture, Bengal, and is appended to this report.

12. The published prices-current returns for the fortnight ending 31st March 1900, as compared with similar returns for the corresponding period of 1899, show that on the last day of the year under review the price of common rice in Calcutta, Howrah, and Backergunge remained unchanged. In Chittagong and Darbhanga there was a slight fall, but in the other 41 districts prices were higher, the Ranchi district showing the greatest rise, *viz.*, 10 seers 4 chitaks per rupee, Palamau, Manbhum, and the Sonthal Parganas 9 seers each, Singhbhum 8 seers, Faridpur 6 seers 8 chitaks, Hazaribagh 6 seers, Patna and Bogra 5 seers 4 chitaks each, &c. The average for the whole year, however, shows that in the Lower Provinces common rice was cheaper in 1899-1900 than in 1898-99.

Prices of common rice at the end of the year.

13. The abstract below shows the average retail prices of food-grains in Bengal during the year 1899, as compared with those ruling in the preceding year:—

CHAPTER II.

EXTERNAL TRADE OF BENGAL.

STATEMENT II.

THE total quantity and value of the inter-provincial trade between Bengal and other provinces in India carried by rail during the year 1899-1900, are compared below with the figures for 1898-99:—

	1898-99.		1899-1900.	
	Quantity. Mds.	Value. Rs.	Quantity. Mds.	Value. Rs.
Imports into Bengal ...	2,27,67,480	14,55,24,510	1,89,43,827 $\frac{73}{160}$	15,27,50,759
Exports from Bengal ...	2,16,83,729	10,84,38,174	4,05,57,765 $\frac{141}{320}$	14,78,82,674
Total ...	4,44,51,209	25,39,62,684	5,95,01,592 [illegible]	30,06,33,433

In comparison with the figures of 1898-99 the aggregate trade carried both ways in 1899-1900, showed a great advance of 150½ lakhs of maunds or 34·0 per cent. While the imports into Bengal fell off by about 38¼ lakhs of maunds or 16·7 per cent., owing chiefly to smaller cousignments of food-grains and oilseeds from the Upper and Central Provinces and Rajputana, the exports from Bengal improved by about 188¾ lakhs of maunds or 87·5 per cent., mainly in consequence of larger despatches of edible grains and coal and coke to all provinces in India.

2. The abstract below gives, province by province, the sources of supply of the imports and the destination of the exports during the past two years. Columns are also added to show the percentage borne by the aggregate trade of each province to the total traffic of the Lower Provinces:—

	1899-1900	4,05,57,765 $\frac{141}{320}$	100

These figures show, as might be expected, that by far the largest trade of Bengal, both import and export, is with the North-Western Provinces and Oudh, the Central Provinces standing second in importance.

3. The quantities and values of the principal articles imported into, and exported from, Bengal during the past year are compared below wiht the

figures of the preceding year. Columns are also added to show the amount of the Calcutta trade:—

5. In consequence of the failure of the autumn rains the season during the year under report was very unfavourable for the cotton crop all over India and the yield was poor, though it was much larger than in the other bad year 1897-98. The price of the staple in India was high, and American cotton which was very cheap supplied the requirements of Europe. Owing to these causes, the imports into Bengal showed a very large decrease of 34·2 per cent. The only country to which larger shipments were made from Calcutta, as compared with 1898-99, was Japan, which obtains its cotton for the finer counts of yarn from America and material for the coarser qualities from India and China. The Chinese cotton being whiter than the Indian is mixed with the latter.

Cotton, raw.

6. In the North-Western Provinces and Oudh and the Panjab, the indigo crop was seriously affected by drought and consequently the supply available was small and the trade did not recover from the depression noticed in the report for 1898-99. The imports in 1899-1900, though showing a slight decrease of 2 per cent., as compared with 1898-99, were as much as 41 per cent. below the figures of 1897-98. Almost all the indigo comes to Calcutta for export by sea, and the shipments last year were the lowest recorded during the past decade, the only countries that took more indigo in 1899-1900 than in 1898-99 being France, Japan, and China.

Indigo.

7. With the exception of the North-Western Provinces and Oudh, the outturn of wheat everywhere in India was much smaller than in 1898-99; and this fact, coupled with a contraction in the demand, chiefly from the United Kingdom, the chief consumer of Indian wheat, which drew larger supplies from the Argentine and Australia, led to a great fall of over 28¼ lakhs of maunds or 41·4 per cent. in the imports of that cereal into Bengal as compared with 1898-99. The provinces showing the largest decreases were the North-Western Provinces and Oudh, the Panjab and the Central Provinces.

Wheat.

8. As was to be expected in a year of scarcity and high prices in the other provinces of India, the imports of all kinds of food-grains into Bengal showed a decrease, the largest falling off being in the receipts of miscellaneous food-grains from the North-Western Provinces and Oudh and the Panjab, of rice from the North-Western Provinces and the Central Provinces, and of gram and pulse from the North-Western Provinces and Oudh, the Panjab, the Central Provinces and Rajputana. The exports, however, of gram and rice from Calcutta by sea during the past year were higher than in the previous five years. The former was exported in larger quantities to Mauritius and Ceylon, and the latter chiefly to the United Kingdom.

Food-grains other than wheat.

9. The enormous increase in the imports of raw hides into Calcutta from the Upper and Central Provinces, Berar and Bombay was due (1) to the heavy mortality among cattle in India owing to the severe drought and scarcity of fodder in 1899, and (2) to a demand from Germany, France, the United States, and Italy.

Hides of cattle.

10. The decrease in the imports of shell-lac into Calcutta from the North-Western Provinces and Oudh, noticed in 1898-99, was followed by a large increase of 45,366 maunds or 37·9 per cent. in 1899-1900, owing to a brisk demand, chiefly from the United Kingdom, the United States, and Germany, which are the largest importers of this article. The exports of this article by sea during the year under report were the largest for the decade.

Shell-lac.

11. The imports from the North-Western Provinces and Oudh again showed an improvement. About three-fourths of the total imports are consigned to Calcutta, where there is always a large local demand. The North-Western Provinces ghi is cheaper than that from Bihar.

Ghi.

12. After a decrease of 99,621 maunds or 29·7 per cent. in 1897-98, and 23,075 maunds or 9·8 per cent. in 1898-99, there was, in 1899-1900, an increase of 48,586 maunds or 22·7 per cent. in the imports of saltpetre into Calcutta from the North-Western Provinces and Oudh and the Panjab to meet a demand from the United States and France. Hitherto the United Kingdom occupied the first, and the United States the second, place in the list of consumers, but in the year under report the position of these countries was reversed. The shipments to the United Kingdom have been declining since 1897-98.

Saltpetre.

13. Owing to drought and other causes the yield of oilseeds in India in 1899-1900 was much below that of 1898-99, and consequently there were smaller despatches of linseed and rape and mustard seed from the Upper and Central Provinces and Rajputana. The falling off in the case of linseed was small, *viz.*, 10·4 per cent., but in the case of rape and mustard seed it was considerable, *viz.*, 41·7 per cent. The shipments to Europe of linseed, which forms the great bulk of the oilseed export, declined by only 4·1 per cent., and, excepting the years 1891-92 and 1898-99, were the largest during the decade. It is stated by the Collector of Customs, Calcutta, that the fall in the exports of linseed by sea was due to there having been a much better crop in the Argentine, and the decline would probably have been greater but for the very deficient harvest in Russia. In the case of rape and mustard seed the exports by sea fell by 39·7 per cent., the drop being attributed to an exceedingly slack demand from Europe for rape oil.

Oilseeds.

14. The yield of tea in Cachar and Sylhet was very unfavourable in 1898, but in 1899, it was particularly large, and consequently the imports from Assam showed a large increase. The exports by sea in 1899-1900 were the highest on record. The United Kingdom, which is the chief consumer of Indian tea, took 10·3 per cent. more than in 1898-99. The average price of tea in Calcutta was 8 annas 3 pie per lb. as against 8 annas 1 pie in 1898-99. In this connection it may be mentioned that the exports of Ceylon tea are rapidly expanding, the largest importing country being the United Kingdom, the exports to which rose by 8·1 per cent. in the year under report.

Tea, Indian.

15. The principal staples in the export traffic, which exhibited marked fluctuations during the year under report, as compared with 1898-99, are noted below :—

16. The great improvement in the quantity of coal and coke exported from Bengal was due chiefly to larger demands on the opening of new sections of railway lines in India and the increased train service in other provinces for the heavy food-grain traffic occasioned by the scarcity.

Coal and coke.

17. In consequence of the poverty of the people caused by the famine and to their inability to purchase such goods, the exports from Calcutta declined by 80,881 maunds. The fall appears in the consignments sent to the Upper and Central Provinces.

Cotton piece-goods, European.

18. Owing to good harvests in Bengal and the failure of crops and high prices in other provinces in India, the exports from the Lower Provinces of all kinds of food-grains, especially rice and gram and pulse increased by 140 lakhs of maunds.

Food-grains.

The subjoined statement shows in a concise form the total exports of all kinds of food-grains from Bengal to each province during the past two years :—

19. The decrease under this head was due chiefly to smaller despatches of cast-iron pipes from Barakar for the Simla Water-works.

Metals—iron and steel (cast).

20. There was a recovery in the trade under this head, due to larger despatches from Budge-Budge to the North-Western Provinces and Oudh, the Panjab, the Central Province, and Rajputana. Owing to its cheapness, this oil is preferred to vegetable oil for lighting purposes.

Kerosene oil.

21. There was again an increase in the exports of sea-imported salt from Calcutta to the North-Western Provinces and Oudh, owing to a falling off in the quantity of Sambhar and other indigenous salt sent to those provinces from Rajputana and the Central Provinces. The importation of salt by sea into Calcutta from foreign countries increased by 6·5 per cent. Of the total imports those from the United Kingdom represented 60 per cent., those from Germany 13 per cent., and those from Aden 10 per cent.

Salt.

22. The season was unfavourable to the sugarcane crop in Bihar and the outturn was again deficient in 1899. This fact, coupled with a restricted demand from Bombay, the North-Western Provinces and Oudh, and Berar, in consequence of the famine led to a falling off in the consignments from Bihar.

Sugar, unrefined.

23. The exports of tobacco leaf from Bihar and Calcutta to other provinces have been steadily declining for the past three years. The crop in Bihar in 1899 suffered from unseasonable rainfall and the outturn was generally below the normal.

Tobacco, unmanufactured.

Both the downward and upward trade advanced, the former by 122 lakhs of maunds or 10·0 per cent., and the latter by 53⅓ lakhs of maunds, or 25·7 per cent. The chief articles which contributed to the improvement in the downward trade were coal and coke, food-grains, and raw jute; and in the upward trade, rice, paddy, and gunny-bags and cloth.

5. *Coal and coke.*—There was a further large advance of 50½ lakhs of maunds in the quantity carried to West Bengal and Calcutta from the Bihar and Chota Nagpur blocks, notwithstanding the fact that the exports by sea were 6·6 per cent. less than in the previous year. The shipments were, nevertheless, much larger than in any other year except 1898-99. There is a growing demand for coal and coke for use in mills, steamers, and for brick-burning purposes, &c.

6. *Cotton piece-goods (European).*—After an increase during the past two years, the trade in the year under report showed a decrease owing to smaller consignments having been sent from Calcutta to the Bihar, Eastern Bengal, Northern Bengal, and Dacca blocks, where probably there were stocks in hand.

7. *Food-grains.*—The large increase in the downward trade was entirely in the consignments of food-grains sent from the Bihar, Western, Eastern and Northern Bengal, and Dacca blocks to Calcutta, chiefly for export to other provinces for local consumption. There was also a larger demand for gram for shipment to Mauritius and Ceylon. The chief cause of the improvement in the upward trade was the despatch of larger quantities of rice and paddy from the Western Bengal, Northern Bengal, and Chota Nagpur blocks to Bihar, which exported all kinds of food-grains very largely to other Provinces in India as will be seen from the table given in paragraph 18, Chapter II of this report.

The following statement shows in a concise form the circulation of all kinds of food-grains between the different internal trade blocks in the Lower Provinces during the past two years:—

8. *Hides.*—Notwithstanding the brisk demand for export to Europe, the imports of hides into Calcutta from Bihar and Dacca decreased, owing probably to the supplies for the foreign seaborne trade having been met by imports from other provinces in India.

9. *Jute, raw.*—In spite of the restricted crop and a comparatively small demand for export to Europe, the imports of raw jute into Calcutta advanced by $10\frac{2}{3}$ lakhs of maunds, the increased supply no doubt finding its way into the mills in and around Calcutta for the manufacture of gunnies for bagging purposes.

10. *Gunny-bags and cloth.*—The increase under this head was in sympathy with the larger traffic in food-grains. The improvement occurred in the despatches from Calcutta to Bihar, Western Bengal, Eastern Bengal, and Northern Bengal, all of which blocks carried on a large trade in edible grains.

11. *Kerosene oil.*—There was again an increase in the exports of kerosene oil to the interior, the advance being in the quantities sent from Budge-Budge, which is situated in the Eastern Bengal block, to Bihar, Western Bengal, Northern Bengal, Chota Nagpur, and Orissa.

12. *Oilseeds.*—Almost the whole of the downward trade in oilseeds is consigned to Calcutta, and linseed is chiefly for export by sea as will be seen from the figures in columns 8 and 9 of the table in paragraph 3. There was a very small increase in the supplies of linseed sent from Western Bengal, Northern Bengal, and Dacca to Calcutta. The shipments to foreign countries were 4·1 per cent. less than in 1898-99, which was a year of exceptionally large exports, but still the figures of the year under review were higher than those of any from 1892-93 to 1897-98. The outturn of linseed in Bengal in 1899-1900, though smaller than that in 1898-99, was larger than the yield in any of the four years ending with 1897-98, and formed 43 per cent. of the total production of India.

13. *Salt.*—The past year records a further decrease in the exports of sea-imported salt from Calcutta to Bihar, Western Bengal, Eastern Bengal, and Dacca.

Acc. No. 13904 Date 1.9.17

14. *Saltpetre.*—For the past three years the imports of saltpetre into Calcutta from Bihar have been steadily declining owing to a smaller outturn. The exports by sea showed an advance of 7·7 per cent., the increase being met by larger supplies from the North-Western Provinces and Oudh.

15. *Tobacco, unmanufactured.*—Though the outturn of the tobacco crop in Bihar was small yet for Bengal as a whole it was better than in 1898-99, being nearly equal to the normal yield, and therefore the imports into Calcutta from Northern Bengal and into Western Bengal from Bihar and Northern Bengal showed an improvement. There was an increase of 15·6 per cent. in the shipments to coast ports, especially to Burma, which took 17½ million pounds, against 14¾ million pounds in 1898-99.

16. *Indigo.*—A diminished demand for export by sea, together with a smaller outturn due to heavy rain in July and August, led to a decrease in the imports into Calcutta from Bihar and Northern Bengal.

17. *Lac-shell.*—There was a brisk demand for this article for export to the United States and Europe, and consequently the imports into Calcutta from the Bihar, Western Bengal, and Chota Nagpur blocks showed a very considerable increase of 50,252 maunds or 76·3 per cent.
